### Creating Your Own Personal Paradise at Home

What do you feel when you walk into your home at the end of the day?

Relief? Joy? Tranquility? Pleasure?

Does your home enchant you?

Does it make your heart sing?

Is it your favorite place to be?

Is it perfectly “you”?

Imagine if you could re-create your home to instantly put you in a good mood.

Design that really works for you is about more than having the right components. It's an expression of your deepest essence. This essence will be uncovered, clarified and refined during this experiential seminar as Claire assists you in setting aside your beliefs about design, your project, and your self.

You'll create a template against which to gage your design choices — a powerful tool you can use immediately. Come away with new possibilities and renewed excitement for your life and your home design project!

You really validated and confirmed my direction."

"After two years of trying different things, I was about to give up and put my house on the market. Now, it's even better than I envisioned it could possibly be. I just LOVE pulling into my driveway at the end of the day! The insights I gained were right on and helped me see why things hadn't been working for me. I'm enjoying my home with a renewed sense of peace and contentment. Thank you for saving me from an unnecessary move! And for helping me to realize the home of my heart."
